## Deep Learning - Theory and Practice

**Basics of Machine Learning** 

18-01-2018

http://leap.ee.iisc.ac.in/sriram/teaching/DL18/ deeplearning.cce2018@gmail.com

## Recap ...

- Decision Theory
  - Inference problem
    - \* Finding the joint density  $p(\mathbf{x}, \mathbf{t})$
  - Decision problem
    - Using the inference to make the classification or regression decision

## Decision Problem - Classification

- Minimizing the mis-classification error
- \* Decision based on maximum posteriors  $argmax_i \ p(C_i|\mathbf{x})$
- Loss matrix
  - \* Can be used for non uniform error weighting.

## Approaches for Inference and Decision

I. Finding the joint density from the data.

$$p(C_k|\mathbf{x}) \propto p(\mathbf{x}|C_k)p(C_k)$$

II. Finding the posteriors directly.

**Neural Networks** 

III. Using discriminant functions for classification.
